Enterprise Architecture

An architecture that serves the organisation using it, not one that exists to be admired.

Format
Fixed-scope review or ongoing advisory

Duration
Typically six to ten weeks for the initial review

Output
Current-state map, target architecture, plan to close the gap

Commercial basis
Fixed fee or day rate

Sound familiar?

- Systems have accumulated faster than anyone has mapped them.
- Every change carries hidden risk, and every new initiative starts with an argument about where it fits.
- A target architecture exists on paper, drawn by people who have moved on, and the organisation is quietly not following it.

Nobody can say with confidence what depends on what.

How it runs

The estate as it actually is, not as the last diagram claimed.

1. **Map.** The estate as it is, tested against the systems.
2. **Sort.** Where complexity earns its keep, and where it is simply cost.
3. **Target.** Sized to what the organisation needs, with business and technology stakeholders together.
4. **Close the gap.** A sequenced plan with the trade-offs named.

What you receive

- A current-state view you can trust
- A target sized to your needs
- A plan to close the gap
- Trade-offs named

What changes

Before		After
Nobody can say what depends on what.	→	**A view tested against the systems themselves.**
Change requests judged by guesswork.	→	**Change judged against real dependency and risk.**
A reference model imported from elsewhere.	→	**A target sized to what the organisation needs.**
Complexity that is invisible, and so free.	→	**Complexity you can see, and cost.**

Done before

100+ architects across every UK engagement, as head of a national practice.
Outsourcing and consulting

1 reusable integration capability, replacing competing stacks across the organisation.
Telecoms

Rebuilt a UK enterprise architecture framework from first principles, after it was lost through reorganisation.
Government technology

One conversation.

No obligation. The right fit matters more than the right brochure.
