Fractional CTO / CIO

Senior technology leadership for organisations that need it, without the full-time appointment.

Format
1–3 days a week

Location
Remote and on-site, UK

Term
Typically 3–12 months

Commercial basis
Monthly retainer

Sound familiar?

- Technology decisions keep landing on the desk of someone not equipped to own them.
- An investor is asking who is accountable for technology before the next round closes.
- The engineering team is delivering, and no one is translating for the board.

These are not engineering problems. They are leadership gaps.

How it runs

On the leadership team, not at the edge of it.

One to three days a week

Typically three to twelve months, reviewed every quarter

Owning the decisions a CTO owns

- Architecture
- Vendors
- Risk posture
- The engineering team

What changes

Before		After
The board keeps asking who owns technology.	→	**A named senior leader accountable, with a strategy the executive team can own.**
The CEO translates between engineering and the board.	→	**Board reporting that says what is true, what it costs and what is being decided.**
Decisions wait for a permanent hire.	→	**Decisions made and documented now.**
A CTO hired from a job description.	→	**A hiring process run by someone who has held the role.**
The cost of a full-time executive.	→	**A fraction of that.**

Done before

2 UK challenger banks architected end to end, working with investors and the non-executive board. One went from first conversation to a hired permanent team.
Financial services

£1.5bn transformation, as one of three architecture directors, with strategies approved at board level.
Telecoms

CISO and CSO, earlier in the career: security held at executive level, with regulatory audits across outsourced businesses.
Outsourcing and consulting

One conversation.

No obligation. The right fit matters more than the right brochure.
